

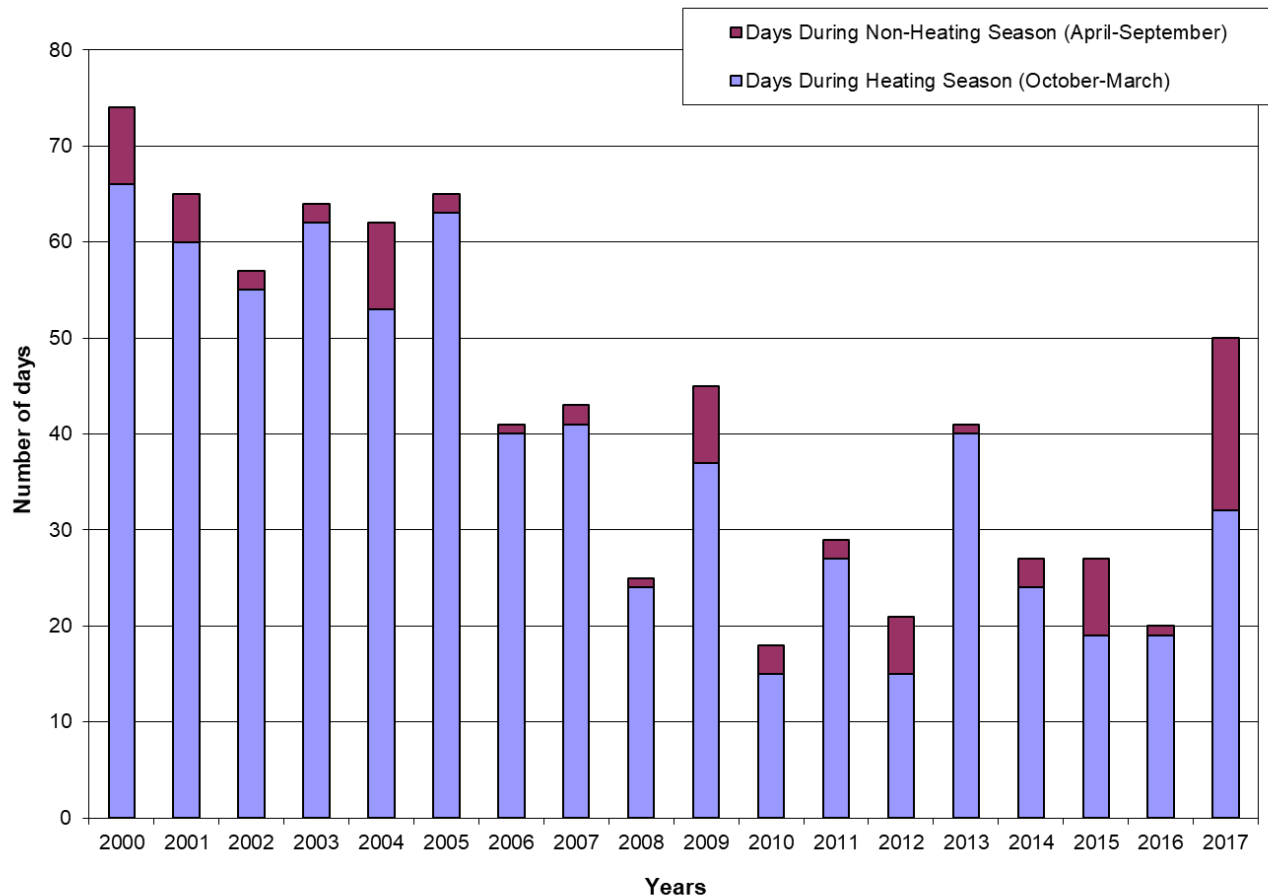

**Figure 1: Days Exceeding the PM<sub>2.5</sub> Health Goal at One or More Monitoring Sites**

Includes data from all sites in King, Kitsap, Pierce, and Snohomish counties, both daily and continuous methods. The Darrington monitor was added in 2004.

Map 2 shows the 98<sup>th</sup> percentile of the 3-year average of daily PM<sub>2.5</sub> concentrations. The map includes only those monitoring sites with three years of complete data from 2015 to 2017. This map incorporates data collected from federal reference, federal equivalent, and nephelometer estimate methods.
